16. REMARKS

BLK 5: Contractor's format acceptable. The Contractor UAS Test Plan and Procedures shall constitute a comprehensive and overall outline of the Contractor's intended test activities to be conducted for unmanned aircraft systems, subsystems or equipments or upon completion of Contractor's upgrade/modification efforts. As a minimum, the Contractor Test Plan shall contain the following: the test concept, the requirements to be satisfied, the methods, elements and responsible individuals or organizational entities associated with the accomplishment of the intended test activities. Specific attention should be given to ensure safety of flight, and demonstrate that the system conforms to specifications. Subordinate documents and plans used to implement or accomplish the Contractor Test Program, as well as documents and forms used to record results of current and previous testing shall be included as part of the test plan.

The Contractor UAS Test Plan and Procedure shall contain the test plans, test approach or methods, and schedules necessary to define and control the Contractors Test Program. The Contractor UAS Test Plan shall identify each element of the system,identify the requirements against the elements,identify the means/facilities to be used to demonstrate or verify performance, identifysummary level pass/fail criteria, and review actions required to complete the contractor testing of a particular element. The Plan shall clearly demonstrate a level of testing that shows compliance with governing specifications and performance requirements applicable to this program.

BLK 10: When feasible, the Contractor UAS Test Plan and Procedures shall be submitted to the Government for approval 30 days prior to initiation of test.

BLK 15: Two (2) draft copies submitted electronically in MS Word format. Five (5) final copies submitted in PDF format. The electronic submittal may be via e-mail.
